 + 1 (778) 939-8089 |  Vancouver, BC

Summary

Full stack developer with background in Software Engineering, and a passion for user experience, interaction design, and strong ability to optimize scalable web apps. Currently working on 2+ front-end projects as a freelance while learning new technologies and new languages. I am excellent at working in cross-functional teams and enjoy collaboration with peers and at this point in my career I am looking to hone my skills and improve my technical abilities. Quick learner with a passion for embracing emerging technologies to deliver user-centric solutions and drive engagement.

Technical Skills

Front-end: HTML, CSS, SaSS, JavaScript, TypeScript, React, Next.js, React Native, WordPress

Backend: Node.js, NestJS, Express.js, SQL, MongoDB, Mongoose, Firebase, Java, C#, PostgreSQL, Prisma

Soft Skills

Excellent communication skills | Teamwork | Problem-solving | Adaptability | Leadership | Organized
Conflict management | Strong work ethic

Projects

Cornerstone Connect | Tech stack: Next.JS, TypeScript, Node.js, PostgreSQL

Demo: <https://cornerstone-connect.onrender.com/>

The purpose of this program is to facilitate the management of college events by providing tools for event creation, modification, and platform publication, thereby enabling users who are students to attend events. It allows users to review the events they have attended.

Repository: <https://github.com/diogoka/eventllege>

Fridgefy | Tech stack: React JS, JavaScript

Demo: <https://fridgefy.onrender.com/>

Web application that allows you to store recipes and ingredients that you have in your fridge. Also, you can search and filter your favorite recipes by ingredients, cuisine, diet and intolerances. The web application is optimized to responsiveness.

Repository: <https://github.com/diogoka/final-project-react-devteamddgm>

Restaurant Rebuilt | Tech stack: HTML, SaSS, JavaScript |

Demo: <https://diogoka.github.io/final-project-wmad2023>

Reimagination of a restaurant's Wix Page from Vancouver. The idea was to modernize the web page of my favorite restaurant in Vancouver using HTML and SaSS. The web page is optimized to responsiveness.

Repository: <https://github.com/diogoka/final-project-wmad2023>

Weather App | Tech stack: HTML, SaSS, JavaScript

Repository: <https://github.com/diogoka/mid-term-webdev2>

Weather Web application in which you can see 5-days-forecast and 3-hour-range for the day choose, and you can save your favorite cities. Application built as a mid-term project for Web Development I at Web and Mobile Application Development Program. The web application is optimized to responsiveness.
